

# Moraine Valley Community College

Moraine Valley Community College, one of the nation's premier two-year institutions of higher learning, is dedicated to student success. Students choose Moraine Valley because of our outstanding academic programs, excellent faculty, convenience, and affordability. We offer more than 110 online courses, and over 118 degree and certificate programs in transfer and career areas. Transfer programs allow students to complete the first two years of their bachelor's degree. Career programs provide intensive skills training for immediate employment in many of today's hot careers. A number of certificates can be completed in a year or less, and new fast-track option packages allows students to complete an associate's degree in less than two years. Day, evening, weekend, online, and one-day-a-week classes are offered at our 294-acre beautifully landscaped and partially forested campus in a university-like setting. Our average class size is 23 students, which enables faculty to get to know their students by name. Please refer to pages 24-35 to find information about specific degrees and certificates offered by Moraine Valley Community College. Contact the Academic Advising office for more specific information. Moraine Valley ranks among the top eight percent of community colleges nationwide in associate's degrees conferred, according to a national newspaper report. Moraine Valley graduates who transfer to four-year schools pay the college the ultimate compliment: 98 percent of the 2001-2002 college transfer graduates responding to a 2003 survey said they would recommend Moraine Valley to their friends.
